

NEWSWIRE

Soybean-Oil

Soybean-Futures are a simple, highly liquid vehicle for speculating on and hedging against price movements in the market for one of the world's most commonly grown crops.

Trade the new Northern Hemisphere crop in **November** and the South American crop in **May**. Our global contracts make it possible for you. Manage risk and diversify your portfolio. We'll explain how in a moment.

First to the product:

In this market, the increasingly important role of soybean oil for alternative **fuels** stands out. And: If diesel (replacement) is the result, no left-wing protester will care about the use of **Roundup** to increase crop yields. On the contrary: the hated product is even turned into a fuel that is more environmentally-friendly because it saves resources.

Soybean oil and its use for energy production

Despite the initial CO2 absorption of the raw materials, biodiesel is now considered to be CO2-neutral, which is expected to continuously increase demand. Last year, biodiesel alone accounted for **35%** of US soybean oil consumption.

US and EU legislation is driving demand for biodiesel and renewable diesel, and both alternative fuels are derived from soybean oil.

Increased demand has pushed soybean oil prices more than doubled in

Manhattan à la carte

Si vis pacem, para bellum

(If you want peace, be prepared for war.)

As sad as it sounds: even the most people cannot live in peace if the evil neighbor does not like it. A look at the Ukraine/ Crimea shows us that it is not enough to declare a desire for peace. One must also be ready, if necessary by force, to inspire fear in the despots of this world.

Lockheed Martin (NYSE: **LMT**) has been doing this for as long as this company has existed.

Granted: The stock has (again) reached a high value. Given a divi-

The SR-72 drone is an unmanned hypersonic surveillance, reconnaissance and attack platform. It is expected to go into service in 2025.

dend of **\$2.80**, payable on 25-Mar-2022 not a particularly high risk.

Lockheed Martin Corporation recently reported fourth quarter 2021 net sales of \$17.7 billion compared to

\$17.0 billion for fourth quarter 2020 net income from continuing operations for fourth quarter 2021.

We therefore recommend a so-called "strip". With this option strategy, you should (continue to) sleep

soundly. If you're young and have

Growth Rates	
YTD	+10.62%
1-Year	+22.16%
3-Year	+35.30%
5-Year	+54.50%
10-Year	+372.64%

more time to wait and see, stocks alone will do.. ☺

to be continued ...

Time to say goodbye

to **Moderna** (NYSE: **MRNA**)), our extreme performer of the last year(s).

With more than **+883.17%** in 3 years you should be satisfied in this overheated market.

If exuberance appeals to you, dare to short the stock while all other recreational traders are outdoing each other with "latest" market news.

In the event of future negative news, they will leave the market faster than they were involved, bet?

the past 12 months, with soybean oil's share of soybean crush margin hitting its highest level in five years, in part due to this demand for feedstocks in the biofuels industry.

Corn is widely believed to be the top biofuel crop due to its long history of use in ethanol production. However, soybean oil is playing an increasingly important role in the alternative fuel space.

Biodiesel and renewable diesel are commonly derived from soybean oil, and the use of soybean oil as a biofuel is expected to increase even further in the years to come, both in terms of soybean oil share by use case and in terms of production by volume.

The soybean oil futures contract can provide exposure to the dynamic and growing biofuels landscape.

The Soybean oil-futures-contract

is one of the simplest contracts: volatile and high yield. If you order a contract today, one will be delivered to you on 11/14/21. Hence the name "Future". Unless you sell it first. At the respective daily price. During this term, we track the daily fluctuations for you and trade accordingly for you, i.e. we buy the "lot" and sell it for you. Several times a day if necessary. The classic "forward" business.

Please see our house brochure for details. Trading is explained to you in a way that is easy to understand on only 2 pages.

Nothing runs like a Deere

is the advertising slogan of one of the largest agricultural machinery manufacturers in the world: **John Deere** (NYSE: DE).

John Deere-Tractor 9R mit 691PS

Growth Rates	
YTD	+9.01%
1-Year	+29.43%
3-Year	+128.09%
5-Year	+246.13%
10-Year	+336.40%

In view of the growing demand for soybean oil in the future, the purchase should be worthwhile for many a good farmer in the Midwest. Up until now, he has been particularly reluctant to apply more pesticides to his fields than he would have liked. That could change now: The partly outdated machines urgently need to be renewed. If you want to be sure that you and your family can continue to work economically in order to till your fields in the future, you will hardly be able to avoid purch-

asing a new, high-performance machine. It doesn't have to be a prairie monster like the 9R.

Diversification:

The Startup Collaborator program helps **John Deere** deepen its interactions with startup companies whose technology could create value for John Deere customers in the future.

Deere & Company has enrolled seven companies in its 2022 Startup Collaborator program.

The startups are **Burro, Crop.Zone, Four Growers, SeeDevice, Ucropit, ViewAR** and **Yard Stick**.

American Water Works (NYSE: AWK).

Despite the ongoing gold boom and completely exaggerated stock bull market, AWK, one of the safest values, especially in times of crisis, is currently relatively unnoticed.

Growth Rates	
YTD	-16.42%
1-Year	-0.74%
3-Year	+65.78%
5-Year	+117.98%
10-Year	+362.94%

While fashion stocks such as **B. Facebook**, Amazon, Snap or Google or Internet department store and hotel portal clones from **Ali Baba** to **Zalando**, all practically without any substance in the imagination of their investors (and only there) assume the most absurd "values", although the annual reports tend to be appear sobering, valuable industrial companies such as **AWK** disappear from view.

The ratings of other analysts also come to our conclusion. Their trend assessments range from "hold" to "buy" to "strong buy" (HSBC, Barclays, Deutsche Bank, etc.).

Let man be noble, helpful and good...

Over the past two years, Illinois American Water has helped more than 15,500 residential customers receive financial assistance to keep water supplies running.

Support was provided through the company's customer support program, **H2O** Help to Others, as well as customer grants credited to qualifying accounts.

"We understand that once an account has defaulted, it can be diffi-

cult to get back on track. We want to help our customers get the support they need and avoid service disruptions,” said Beth Matthews, vice president of operations.

The program is administered by Salvation Army agencies within the company's service division. The H2O Help to Others program provides up to \$200 in assistance to customers facing financial hardship, regardless of income.

American Water provides our customers with safe, clean, affordable, and reliable water services to keep their lives moving.

amwater.com

Whether nobility pays off is anyone's guess;

Definitely more effective than any commercial advertisement...

The seven companies that John Deere has accepted into the program include:

- **Burro** – A company that provides human-centric robotic platforms that help farm workers be more productive today, while laying the foundation for full automation of tomorrow's most labor-intensive farming tasks.
- **CropZone.com** - Crop.Zone is the electrifying solution for any grower looking for a sustainable and reliable solution to control weeds and dry crops without residue.
- **Four Growers** - A company providing robotic harvesting and analysis for high value crops - starting with greenhouse tomatoes.
- **SeeDevice** - A company working to provide enhanced CMOS-SWIR imaging capabilities and performance using quantum-based photodetector technology for smart devices in automotive, biomedical and machine vision applications.
- **Ucropit** - A company that brings farmers and companies together to create, collect and share Crop Stories(TM) with verified sustainability traceability.
- **ViewAR** - A company with 10+ years of experience developing Augmented Reality (AR) business solutions that address many customer problems and use cases such as: high-quality AR apps and start their augmented reality journey.
- **Yard Stick** - A company developing low-cost, instantaneous, in-situ soil carbon measurement technologies to enable gigatons/year of carbon removal by agriculture.

Let's keep our fingers crossed for good luck —

America has always been, and always will be, the land of profound innovation.
